Schluter®-DITRA-PS

Schluter®-DITRA-PS is a peel and stick membrane that features a pressure-sensitive adhesive (PSA) to bond the membrane to the substrate, replacing the need for thin-set mortar. Simply remove the transparent release film from the fleece side of the membrane to expose the layer of adhesive and embed into the substrate using a float, screed trowel, or DITRA-ROLLER. DITRA-PS offers the same core functions as DITRA: uncoupling, support/load distribution, waterproofing, and vapor management.

Note: For applications requiring compliance with or certification to the ANSI A118.10 American National Standard Specifications for Load Bearing, Bonded, Waterproof Membranes for Thin-Set Ceramic Tile and Dimension Stone Installation, select the DITRA membrane that is installed with thin-set mortar. Alternatively, the DITRA-PS membrane may be covered with the Schluter®-KERDI membrane, which is certified to meet ANSI A118.10.

Schluter®-KERDI-FLEX

Schluter®-KERDI-FLEX is a flexible polyethylene waterproofing strip used to seal movement joints over Schluter®-DITRA in specialty applications where large movements are expected, i.e. over expansion joints or construction joints.

Note: 1 mil = 1 one-thousandth of an inch
